Contents of Volume 68

Number 1, September 1977

MANN, J. E. JR., FOLEY, E. and SPERELAKIS, N., Resistance and Potential Profiles in the Cleft between Two Myocardial Cells; Electrical Analog and Computer Simulations 1

SCHOBERT, B., Is There an Osmotic Regulatory Mechanism in Algae and Higher Plants? 17

KIM, M. and PERRY, S., Mathematical Methods for Determining Cell DNA Synthesis Rate and Age Distribution Utilizing Flow Microfluorometry 27

JANSSON, B. and RÉVÉSZ, L., Cell Ecology: Deductive and Dynamic Models for Proliferation, Differentiation and Competition of Tumor Cell Populations 43

LASSALLES, J. P. and THELLIER, M., Discussion on the Symmetry of Macroscopic Coefficients in the Formulation of the Cellular Fluxes: Possible Application to a "Symmetry Criterion" for the Study of Active and Passive Transports 53

KRISHNAMURTHY, L., Functional Properties and Organization of Grazing Lands Ecosystem 65

KELLER, S. R., Mechanics of Flagellar Motion with an Application to a Conical Spiral Flagellate 73

WENT, H. A., Can a Reverse Transcriptase be Involved in Centriole Duplication? 95

BHARGAVA, P. M., Regulation of Cell Division and Malignant Transformation: A New Model for Control by Uptake of Nutrients . 101

BELLO, J., Stability of Protein Conformation: Internal Packing and Enthalpy of Fusion of Model Compounds 139

NISBET, R. M., GURNEY, W. S. C. and PETTIPHER, M. A., An Evaluation of Linear Models of Population Fluctuations 143

LETTER TO THE EDITOR

HUF, E. G. and HOWELL, J. R., Global Na^+ Diffusion Coefficient in a Multicompartment Frog Skin Epidermis Model . . 161

Number 2, September 1977

GOEL, N. S. and ISLAM, S., Error Catastrophe in and the Evolution of the Protein Synthesizing Machinery 167

MURAKAMI, H., TAIRA, S. and MORI, H., Modes of DNA Replication Primed with the Oligomer of Palindrome 183

BURNS, J. A. and KACSER, H., Allosteric Repression: An Analysis . 199

YOSHIDA, A., Theoretical Approaches to the Microphonics . . 215

DESIMONE, J. A., Perturbations in the Structure of the Double Layer at an Enzymic Surface 225

SABESAN, M. N. and BALASUBRAMANIAN, R., An Energy Minimization Technique using the Least-squares Method 241

PYSHNOV, M. B. and REGGIRT, S. A., Deterministic Model of Steady-state Cell Proliferation 247

GALLAHER, E. E. and BLAKE, N. J., On Equivalent Forms of Whittaker's Similarity Index 259

WELCH, G. R., On the Free Energy "Cost of Transition" in Intermediary Metabolic Processes and the Evolution of Cellular Infrastructure 267

CLARKE, J. R., Fluidity-induced Changes in Diffusion through Membranes: a Predictive Model 293

GREEN, P. B. and BAUER, K., Analysing the Changing Cell Cycle . 299

CONSTANTINO, R. F., GINZBURG, L. R., and MOFFA, A. M., An Experimental Check of Fitness Entropy vs. Selective Delay . . . 317

Number 3, October 1977

VON HEIJNE, G., NILSSON, L. and BLOMBERG, C., Translation and Messenger RNA Secondary Structure 321

LADDE, G. S., Competitive Processes. II. Stability of Random Systems 331

MACDONALD, R. D., YAMAMOTO, T. and FEDORAK, P., Statistical Prediction of the Number of Cells Surviving Infection by an Autointerfering Virus using the Poisson Distribution . . . 355

MAZAT, J-P., LANGLA, J. and MAZAT, F., Double-site Enzymes and Squatting. A Study of the Regulation by One or Several Ligands Binding at Two Different Classes of Site 365

CHATTERJEE, A. N., DOYLE, R. J. and STREIPS, U. N., A Proposed Functional Role for Bacterial *N*-Acetylmuramyl-L-alanine Amidases 385

AINSWORTH, S., A Simple Model for a Regulatory Enzyme . . 391

HO, S. V. and SHULER, M. L., Predictions of Cellular Growth Patterns by a Feedback Model 415

MOREL, J. E. and GINGOLD, M. P., On a Simple Way to Verify the Experimental Agreement of any Two-State Mathematical Model of Muscle Contraction 437

LETTERS TO THE EDITOR

KOPPENHÖFER, E., ODE, A., RIMMEL, C., SCHRAMM, M., SCHUBACK, P. and SCHUMANN, H., Isolated *Nitella* Protoplasm is not Excitable 449

KOBATAKE, Y., On the Excitability of Naked Protoplasmic Droplets of *Nitella* 453

MCCOY, J .W. Complexity in Organic Evolution 457

Number 4, October 1977

TOMITA, K., ITŌ, A. and OHTA, T., Simplified Model for Belousov–Zhabotinsky Reaction 459

PONNUSWAMY, P. K. and LAKSHMANAN, M., A Non-linear Model for the Synaptic Basis of Neuronal Memory 483

ORDAL, G. W. and FIELDS, R. B., A Biochemical Mechanism for Bacterial Chemotaxis 491

MATSUDAIRA, Y., HIEDA, K. and YAMASAKI, T., On Two Models for the Frequency Distribution of Lethals in *Drosophila* Observed in F_3s Derived from a Single F_1 Gonadal Mosaic Female, and the Transmissibility 501

JURKA, J. W., On Replication of Nucleic Acids in Relation to the Evolution of the Genetic Code and of Proteins 515

KURGANOV, B. I., The Theoretical Analysis of Kinetic Behaviour of "Hysteretic" Allosteric Enzymes 521

GINZBURG, L. R., The Equilibrium and Stability for n Alleles under the Density-dependent Selection 545

BABLOYANTZ, A., Self-organization Phenomena Resulting from Cell–Cell Contact 551

LETTER TO THE EDITOR

JI, S., A Possible Molecular Mechanism of Free Energy Transfer in Oxidative Phosphorylation 607

Index to Volume 68

AINSWORTH, S., A simple model for a regulatory enzyme, 391
Algae and higher plants, is there an osmotic regulatory mechanism in?, 17
n Alleles under the density-dependent selection, the equilibrium and stability for, 545
Allosteric enzymes, the theoretical analysis of kinetic behaviour of "hysteretic", 521
Allosteric repression: An analysis, 199
Analysing the changing cell cycle, 299

BABLOYANTZ, A., Self-organization phenomena resulting from cell–cell contact, 551
Bacterial chemotaxis, a biochemical mechanism for, 491
Bacterial *N*-Acetylmuramyl-L-alanine amidases, a proposed functional role for, 385
BALASUBRAMANIAN, R. (see SABESAN, M. N.), 241
BAUER, K. (see GREEN, P. B.), 299
BELLO, J., Stability of protein conformation: Internal packing and enthalpy o fusion of model compounds, 139
Belousov-Zhabotinsky reaction, simplified model for, 459
BHARGAVA, P. M., Regulation of cell division and malignant transformation: A new model for control by uptake of nutrients, 101
Biological hierarchies, control Markov chain models for, 563
Biochemical mechanism for bacterial chemotaxis, 491
BLAKE, N. J. (see GALLAHER, E. E.), 259
BLOMBERG, C. (see VON HEIJNE, G.), 327
BURNS, J. A. and KACSER, H., Allosteric repression: An analysis, 199

Cell–cell contact, self-organization phenomena resulting from, 551
Cell cycle, analysing the, 299
Cell division and malignant transformation: A new model for control by uptake of nutrients, regulation of, 101
Cell ecology: Deduction and dynamic models for proliferation, differentiation and competition of tumor cell populations, 43
Cell proliferation, deterministic model of steady-state, 247
Cellular fluxes: Possible application to a "symmetry criterion" for the study of active and passive transports, discussion on the symmetry of macroscopic coefficients in the formulation of the, 53
Cellular growth patterns by a feedback model, predictions of, 415
Cellular infrastructure, on the free energy "cost of transition" in intermediary metabolic processes and the evolution of, 267
Centriole duplication, can a reverse transcriptase be involved in?, 95
CHATTERJEE, A. N., DOYLE, R. J. and STREIPS, U. N., A proposed functional role for bacterial *N*-Acetylmuramyl-L-alanine amidases, 385
CLARKE, J. R., Fluidity-induced changes in diffusion through membranes: a predictive model, 293
Competitive processes. II. Stability of random systems, 331
Complexity in organic evolution (letter), 457

CONSTANTINO, R. F., GINZBURG, L. R. and MOFFA, A. M., An experimental check of fitness entropy vs. selective delay, 317
Contact pressure model for semi-decussate and related phyllotaxis, 583
Control Markov chain models for biological hierarchies, 563

DESIMONE, J. A., Perturbations in the structure of the double layer at an enzymic surface, 225
Deterministic model of steady-state cell proliferation, 247
Discussion on the symmetry of macroscopic coefficients in the formulation of the cellular fluxes: Possible application to a "symmetry criterion" for the study of active and passive transports, 53
DNA replication primed with the oligomer of palindrome, modes of, 183
DNA synthesis rate and age distribution utilizing flow microfluorometry, mathematical methods for determining cell, 27
Double layer at an enzymic surface, perturbation in the structure of the, 225
Double-site enzymes and squatting. A study of the regulation by one or several ligands binding at two different classes of site, 365
DOYLE, R. J. (see CHATTERJEE, A. N.), 385

Energy minimization technique using the least-squares method, 241
Entropy vs. selective delay, an experimental check of fitness, 317
Enzyme, a simple model for a regulatory, 391
Epidermis model, global Na^+ diffusion coefficient in a multicompartment frog skin (letter), 161
Equilibrium and stability for n alleles under the density-dependent selection, 545
Equivalent forms of Whittaker's similarity index, 259
Error catastrophe in and evolution of the protein synthesizing machinery, 167
Evaluation of linear models of population fluctuations, 143
Excitability of naked protoplasmic droplets of *Nitella* (letter), 453
Experimental check of fitness entropy vs. selective delay, 317

FEDORAK, P. (see MACDONALD, R. D.), 355
FIELDS, R. B. (see ORDAL, G. W.), 491
Flagella motion with an application to a conical spiral flagellate, mechanics of, 73
Fluidity induced changes through membranes: a predictive model, 293
FOLEY, E. (see MANN, J. E. JR.), 1
Free energy "cost of transition" in intermediary metabolic processes and the evolution of cellular infrastructure, 267
Functional properties and organization of grazing lands ecosystem, 65

GALLAHER, E. E. and BLAKE, N. J., On equivalent forms of Whittaker's similarity index, 259.
